SUSTAINABILITY

We're committed to meeting the needs of end users and retailers of our products, without compromising the quality of life for future generations.

To do this, we are focusing on three key areas which we believe bring the largest positive change: **Packaging**, **Supply Chain**, and our **Buildings**.

SUSTAINABLE BUILDINGS

Revitalising our Head Office and Warehouse is a key strategy for our sustainability plans.

From increased recycling to using energy-efficient lights, we are committed to making a positive change.

- **Solar panels** at our head office and warehouse allow us to produce 40,000kwh of electricity.
- **Electric Vehicle (EV) charging stations** with the Octopus electric vehicle scheme.
- **Energy-efficient** LED lights and motion sensors to stop electricity wastage.
- Actively **reducing paper printing** at our office and warehouse.
- Using **recycled packaging materials** for deliveries and parcels.
- **Volunteering and charity efforts** within our local community.

Our solar panels save the equivalent power of:

13 UK households for a year

- Powering an e-bike 2 million miles

- Making 4 million cups of tea

An average EV reduces carbon emissions by over 70% over its lifetime compared to a petrol car.

Sustainability Case Study

As a brand whose reason for being is the preservation of summer crops for year-round consumption, Mrs Elswood recognises the importance of sustainability.

Water

Water used in growing comes from local groundwater and rivers.

Recycled water is used to wash the cucumbers before packing, and rainwater is collected and used to cool down the jars after they have been heat-sealed. Water in production is monitored to reduce consumption.

Cucumbers

Cucumbers are grown in fields under the summer sun, without energy used to heat a glasshouse or cool a refrigerator.

Over 99% of the harvest is used.

Pickling Brine

Most Mrs Elswood gherkins are pickled directly in the jars, with brine made to order to minimise wastage.

Ingredients

Ingredients and packaging materials are sourced locally where possible.

Metal Lids

Because metal recycles forever, Mrs Elswood's lids are made from recycled steel and a thin layer of tin.

Paper Labels

Our labels are sourced locally and made with FSC-certified paper.

Inks used are water-based, not solvent or alcohol.

The glue used is water-soluble for easy removal of labels.

Lower Emissions

The production of our gherkins is done in a way that minimises CO₂ emissions, with electricity coming from green energy.

Glass Jars

Glass recycles forever, and Mrs Elswood's glass jars are made with up to 85% recycled content.

What do you do when you're 5,000 miles from home and missing the comfort food you grew up on? For Giuseppe Mezzetta, the answer was obvious - import it to America.

In 1935, Mezzetta opened a storefront in San Francisco, introducing the staples of his Italian childhood to the local community. Now based in the Napa Valley, Mezzetta brings a distinctly Californian style to the table.

VERSATILE

Whether supplying chefs or retailers, these fats offer versatile uses, from roast potatoes, confits, shortcrust pastries to premium sauces, stocks, and gourmet fry-ups.

From beef dripping in Yorkshire-style chips to duck fat in confit vegetables, premium rendered animal fats answer the growing demand for natural, flavoursome, heritage-driven ingredients¹.
